## TC Racer Captures 2009 MORE Class 1450 Championship

TOTAL CHAOS driver Tim Scott from Cypress, CA clinches the 2009 MORE Off Road Championship in class 1450. After a fierce battle for the overall championship and podium positions during the final race of the season, Tim edged out the competition capturing his first off road championship in a 4 Wheel vehicle and first place by 6 minutes at the final stop of the series. Tim's racing background in District 37 events on motorcycles took a back seat 2 years ago when he decided to build a Toyota 2wd race truck. Tim equipped the truck with a TOTAL CHAOS Fabrication 2wd lift spindle uniball kit that had a proven race win and championship record.

When TOTAL CHAOS released the 92202-UPG system (dual 2.5 shock and heim upper pivot control arm upgrade system) Tim took full advantage of the increased dampening control and installed the system on his race truck. "It did not take long for another racer to earn TOTOAL CHAOS another championship running the 84-95 2wd lift spindle uniball kits we manufacture", stated TCF marketing director Nicole Pitell. "We have had a lot of drivers compete on the original single 2.5 coil over system and we knew it was time to offer the racers dual shock capability to increase dampening control and ride quality for race speeds."

The new dual 2.5 shock system for the 84-95 2wd 5 lug was released in March of 2009. The kit cycles 13.5" of wheel travel and incorporates 7/8" heim upper control arm pivots. The kit is designed to run dual rate 10" travel 2.5" coil over shocks and 10"x 2.5" bypass shocks. Custom fabrication is necessary to install this kit.
